

DIAMOND DEMO TOUR KICKING OFF DECEMBER 5

- **New DA40NG Demonstrator to tour Queensland, New South Wales and Victoria**
- **Tour billed as the “Beat the Price Rise Show”**
- **Shows strong commitment to General Aviation in the face of Covid 19**

Sydney, November 25 2020 – Utility Air Pty Ltd (“Utility Air”), exclusive Distributor for Diamond Aircraft in the region, has announced that a new Diamond DA40NG Aircraft is going to commence a demo tour on December 5 through Queensland, New South Wales and Victoria.

The aircraft, in Utility Air Livery, will be travelling down the East Coast on the following dates –

Saturday December 5 – Brisbane and surrounds

Sunday December 6 – Gold Coast

Monday December 7 – Toowoomba

Tuesday December 8 – Melbourne and Surrounds

Wednesday December 9 – Lilydale and Ballarat

Thursday December 10 – Tamworth and Bathurst

Friday December 11 – Sydney and surrounds

Saturday December 12 – Sydney and surrounds

The timing of the demonstrator tour is critical, with industry price rises coming through next year. Utility Air plans to offer 2021 production slots at 2020 pricing as a call to action for customers who have been sitting on the side line during the recent lockdowns.

John Oppenheim, a Director of Utility Air, commented, “After the slowdown in flying and events caused by Covid 19, we are excited to be able to invest in the future of Aviation in the region again. Bringing this aircraft to our marketplace shows a commitment not just to Diamond Aircraft but also to all our owners and prospective customers in Australia and New Zealand. It is only through investment in the growth of aviation and marketing that we’ll get back to where we all want to be...Flying.”

Utility Air’s Managing Director, Stephen Pembro was effusive about the product. “This aircraft represents the future. We’ve been selling them steadily now for over a year and Diamond is currently the number 2 manufacturer of light aircraft in the world. Bringing a cutting edge DA40 NG into the

country for demonstrations, which burns only 19.5 liters of Jet A1 per hour and has state of the art Avionics, will help further cement Diamond as a favorite in our Region. I can't wait to show the aircraft off."

There will be ample time to show the aircraft at each stop to interested customers and also journalists.

About Utility Air:

Operating from corporate headquarters in Sydney, Australia, Utility Air provides unparalleled turn-key aviation solutions throughout APAC, including aircraft brokerage, sales, and acquisitions for both new and pre-owned aircraft. Utility Air is the exclusive distributor for both Viking and Diamond Aircraft.

About the Diamond DA40NG:

Whether you are a new aviator looking for the perfect first airplane or an experienced IFR pilot with discerning tastes, the DA40, available either with a jet fuel or an AVGAS engine, is the smart choice. The durable composite airframe, ultra-low fuel burn and superb handling make the DA40 a great airplane for travel, leaseback, and training alike.

For luxurious comfort and style, available features include premium leather interiors in several designs and colors, adjustable pilot seatbacks and lumbar support, electrically adjustable rudder pedals, electric air conditioning, and much more.

The DA40 fully integrated G1000 NXi flight deck, incorporating the latest features with optional ultra-precise GFC700 Automatic Flight Control System, offers superior situational awareness, convenience and safety. Available equipment provides Traffic Advisories, Synthetic Vision Technology, Satellite WX and Entertainment, and **more**.
