

FOR IMMEDIATE RELEASE

Utility Air Announces Delivery of Two Diamond DA40XLT Aircraft to Flight Training Adelaide

September 18, 2023 – Utility Air, a leading provider of aviation solutions, is thrilled to announce the successful sale and delivery of two state-of-the-art Diamond DA40XLT aircraft to Flight Training Adelaide (FTA). The highly anticipated aircraft sale, which was finalized last year, marks a significant milestone in FTA's commitment to enhancing their pilot training programs with cutting-edge technology.

The Diamond DA40XLT, known for its versatility, reliability, and advanced features, is a top choice among aviation enthusiasts. The two DA40 XLT's, equipped specifically for flight training purposes, these aircraft offer unparalleled performance and safety characteristics, making them ideal for FTA's training needs.

"We are delighted to deliver these two Diamond DA40XLT aircraft to Flight Training Adelaide," said Stephen Pembro, Managing Director of Utility Air. "As a trusted partner, we are proud to contribute to FTA's mission of providing exceptional pilot training experiences. These aircraft, with their innovative technology and exceptional performance, will undoubtedly elevate their training programs to new heights."

The addition of these aircraft will provide numerous benefits to FTA's training operations. The Diamond DA40XLT offers an all-composite airframe, resulting in improved fuel efficiency, reduced environmental impact, and excellent cruising speeds. Equipped with advanced avionics and flight instruments, these aircraft provide an enhanced learning experience for flight students, allowing them to develop crucial skills in communication, navigation, and situational awareness.

Furthermore, the Garmin G1000 NXi avionics suite integrated into the Diamond DA40XLT ensures enhanced safety through features such as real-time weather information, traffic awareness, and terrain avoidance systems. This technology empowers FTA instructors to train aspiring pilots in the most realistic and up-to-date aviation environments.

Pine Pinaar, CEO of Flight Training Adelaide, expressed his enthusiasm for the arrival of the new aircraft, stating, "These Diamond DA40XLT aircraft represent a significant addition to our training

fleet of 74 aircraft. Their modern features and exceptional performance will enable our students to train in a superior learning environment, preparing them for successful careers in aviation."

Utility Air takes immense pride in delivering industry-leading aviation solutions to its esteemed clients. The successful delivery of these state-of-the-art aircraft to Flight Training Adelaide further solidifies the company's commitment to supporting the growth and evolution of the aviation training sector.
